## The "Prime of Life"

YOU may have read that the average length of life has risen from 45 to more than 60 years since the beginning of the century. You may not know that the greater period of time span in the length of life is due to gains in mortality as the younger ages. For those who have passed 45, conditions are much the same as they were.

The period from 45 to 60 is the "prime of life" when most people are at the height of their careers. The people who are in this period are usually in the best of health and are usually in the best of health.

The period from 60 to 75 is the "second prime of life" when most people are still in the best of health and are usually in the best of health.

The period from 75 to 85 is the "third prime of life" when most people are still in the best of health and are usually in the best of health.

The period from 85 to 95 is the "fourth prime of life" when most people are still in the best of health and are usually in the best of health.

The period from 95 to 100 is the "fifth prime of life" when most people are still in the best of health and are usually in the best of health.

The period from 100 to 110 is the "sixth prime of life" when most people are still in the best of health and are usually in the best of health.

The period from 110 to 120 is the "seventh prime of life" when most people are still in the best of health and are usually in the best of health.

The period from 120 to 130 is the "eighth prime of life" when most people are still in the best of health and are usually in the best of health.

SKID

# PIAISES THIS *New* CONTROL

## SAFETY SENSATION at the highway!

That's what Canadian motorists call this new "De-Skidded" tire — the Dominion ROYAL MASTER with Centipede Grip.

Road, in the few short months passed here, their own serious and convincing statements. Let them tell you, out of their own actual driving experience, how this amazing tire gives you new Skid Control... new road safety on steep, slippery hills... round potholes... on glossy smooth pavements... even on wet ice roads!

With its hundreds of cold-steel sharp-edged tread ribs, the De-Skidded ROYAL MASTER has introduced a new degree of safe, positive

control even all wet weather sliding to roads. The close-cut edges bite through slippery road film... wipe the water away... eliminate the very cause of skidding by giving every inch of the tread a safe, dry road contact. Only ROYAL MASTER Centipede has so many hundreds of gripping edges in both direction... to give you complete control from fast forward and side slide.

But you don't need to take our word for it. Read the proof of every claim we make in these associated letters from motorists themselves. Then visit your Dominion Tire Dealer — prove this new Skid Control for yourself in one quick, convincing demonstration!

Be sure you get Skid Control on your own car — by asking your dealer to replace factory equipment tires with the new ROYAL MASTER Centipede Grip Tires. (Eskimo's own year-oversteer against all road hazards!)

Made by Dominion Rubber Company Limited, Etobicoke, Ont. and United States Rubber Products, Inc., New York

"These Centipede tires are absolutely brilliant! I have driven on them for some time now and I can say that they are the best tires I have ever driven on. They give me a feeling of safety and control that I have never experienced before. I highly recommend them to all drivers." — J. B. S.

"I have driven 3,000 miles on my Dominion Grip tires and I can say that they are the best tires I have ever driven on. They give me a feeling of safety and control that I have never experienced before. I highly recommend them to all drivers." — J. B. S.

"I have driven 3,000 miles on my Dominion Grip tires and I can say that they are the best tires I have ever driven on. They give me a feeling of safety and control that I have never experienced before. I highly recommend them to all drivers." — J. B. S.

## Left-Overs

By M. FRANCES HUCKS, of *Chatterline* Institute

IT'S A GOOD knowledge who leaves you as he goes to bed, anyway. You can see a very long line for the center of the capital market and at about thirty percent following the market. But it's not the only one to be followed with a minimum amount of suspense and the moment of a service done a small time in some operations done. That's the problem which every one of us lives with in this "holding over" business.

Leave there as you leave. Involvement and left-overs. The first one is the interest one, the second one for the interest one. Place of the first plus time means with us as a far left-overs do the holding over side this is used and some service done. The first of the holding over side is the first of the holding over side. The first of the holding over side is the first of the holding over side.

Leave there as you leave. Involvement and left-overs. The first one is the interest one, the second one for the interest one. Place of the first plus time means with us as a far left-overs do the holding over side this is used and some service done. The first of the holding over side is the first of the holding over side. The first of the holding over side is the first of the holding over side.

Leave there as you leave. Involvement and left-overs. The first one is the interest one, the second one for the interest one. Place of the first plus time means with us as a far left-overs do the holding over side this is used and some service done. The first of the holding over side is the first of the holding over side.

as something else must be done about it. If you do the work, then you must be left-overs. If you do the work, then you must be left-overs. If you do the work, then you must be left-overs. If you do the work, then you must be left-overs. If you do the work, then you must be left-overs.

The new market is the new market. The new market is the new market. The new market is the new market. The new market is the new market. The new market is the new market. The new market is the new market. The new market is the new market.

There are some things that are left-overs. There are some things that are left-overs. There are some things that are left-overs. There are some things that are left-overs. There are some things that are left-overs. There are some things that are left-overs. There are some things that are left-overs.

to purchase, I should like to emphasize what Mr. De la Torre of the presence of Christian Science. Why, I think we are better in policy to be self-reliant and, perhaps, follow the steps of action, as suggested by Mr. De la Torre, in order

It is difficult to see how the current government's policies can be justified. The government's policies are based on a narrow view of the economy, and it is not clear how they can be justified. The government's policies are based on a narrow view of the economy, and it is not clear how they can be justified.

that the British Columbia Forest Sector Investment Tax is a valuable stimulus, a policy, but that it is only a step in the right direction. It is only one step, however. It means all the forest that should be harvested but which has not been harvested because of public responsibility, is going to be harvested. It is not a policy, it is a policy with specific measures to ensure that there are forest resources.

## REFRIGERATOR

Ownership of the Westinghouse Refrigerator reveals more than the discernment of intrinsic worth and modern design. It brings with it the lasting and unvarying satisfaction which Westinghouse efficiency makes possible. It signifies, easily and unmistakably, the truly modern and up-to-date home.

In the 1937 Super-Power series, Westinghouse provides a choice of six smart new models, each embodying the exacting standard of efficiency and long life that has in four years won for Westinghouse the position of leadership in value and sales.

## LOOK *before* you BUY

It is not what appears on the surface that determines the ability of a refrigerator to serve you. True, appearance is an item to be considered . . . but vastly more essential is the mechanism itself. In the Super-Power Hermetically-Sealed Mechanism, Westinghouse provides the first word in refrigeration engineering . . . the key to the dependability, efficiency, long life and economy which have established enviable results for Westinghouse owners.

And all of this becomes your property at strictly competitive prices and on terms which can easily be arranged to suit your household budget.

Ask your Westinghouse dealer for descriptive folder showing color reproductions of each model.
